PROFESSIONAL SUMMARY

Motivated BCA graduate and Java Full Stack Developer with hands-on experience designing, developing, and deploying web applications using Java, Spring Boot, Spring Security, Spring Data JPA, Hibernate, Thymeleaf, and MySQL. Built full-stack applications featuring secure authentication, analytics dashboards, scheduled jobs, email notifications, report generation, and role-based access control. Proficient in OOP, MVC architecture, REST APIs, database design, SDLC, and unit testing. Seeking a Software Developer role to build scalable and high-quality backend and full-stack solutions.

TECHNICAL SKILLS

Programming: Java, SQL, JavaScript, HTML5, CSS3, Python, C
Frameworks: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, Thymeleaf, Servlets, JSP, JDBC
Database: MySQL, SQLite
Tools: IntelliJ IDEA, VS Code, Git, GitHub, Maven, MySQL Workbench, Postman
Libraries: Chart.js, Apache POI, iText PDF, OpenCSV
Testing & Concepts: JUnit 5, Mockito, OOP, Collections, Exception Handling, MVC, SDLC, Bean Validation, Authentication & Authorization, CRUD, REST APIs, API Integration, Relational Database Design, Debugging

PROJECTS

Automated Expense & Subscription Tracker Java | Spring Boot | Spring Security | JPA | Hibernate | Thymeleaf | MySQL | Maven

- Developed a production-grade full-stack expense management web application using Java, Spring Boot, Thymeleaf, and MySQL following layered MVC architecture.
- Designed and implemented 9 database entities, 9 controllers, 12 service classes, and 9 repositories for modular, maintainable code.
- Implemented secure authentication using Spring Security with BCrypt password encryption, Remember Me, account locking, password reset, and role-based authorization.
- Built CRUD modules for expenses, budgets, subscriptions, categories, user profiles, and settings.
- Created an interactive analytics dashboard with Chart.js visualizations, spending summaries, and recent activity tracking.
- Implemented automated email notifications, scheduled background jobs, and PDF, Excel, and CSV report generation using Apache POI, iText PDF, and OpenCSV.
- Applied Bean Validation, global exception handling, and unit testing using JUnit 5 and Mockito.
- GitHub:** github.com/amannizar/expense-tracker

Gym Management System Java | Spring Boot | Spring Security | Thymeleaf | MySQL | Maven

- Developed a full-stack gym management application using Java, Spring Boot, Thymeleaf, and MySQL following layered MVC architecture.
- Implemented role-based authentication and authorization using Spring Security for secure member and administrator access.
- Built member features including personalized dashboards, BMI tracking, membership status, workout logs, diet plans, health metrics, and attendance tracking.
- Developed an admin dashboard for managing members, trainers, equipment, memberships, attendance, announcements, and revenue analytics.
- Integrated AI Coach functionality for personalized workout and fitness guidance based on member information.
- Designed MySQL data models for members, workouts, health metrics, diet consultations, memberships, attendance, and administrative operations.
- Implemented premium membership plans with subscription tracking, payment status, and membership validity management.

EDUCATION

Bachelor of Computer Applications (BCA) 2026

Presidency College (Autonomous), Bengaluru | Aggregate: 69%
Key Coursework: Database Management, Web Technologies, Software Engineering, OOP

Java Full Stack Development Jul 2026 – Present

QSpiders, Bengaluru
Technologies: Core Java, Advanced Java, JDBC, Servlets, JSP, Hibernate, Spring, Spring Boot, Spring Security, Spring Data JPA, SQL, MySQL, HTML5, CSS3, JavaScript, Git, Maven

CERTIFICATIONS

Cybersecurity Assessment – LearnTube | AI Tools & ChatGPT Workshop – be10X
SYNTAXIA 2024 – St. Joseph's University | Career Opportunities in IT & ITES – ICT Academy
